

Evaluation of the training course

Management of R & D project, Innovation and Technology Transfer

Duration: 19th October 2010 – 20th October 2010

Evaluation and certification: 2nd of November 2010

This evaluation was prepared based on 21 received questionnaires filled by course participants.

4 = excellent; 3 = good; 2 = reasonable 1 = to be improved; 0 = poor		4	3	2	1	0
Venue, equipment	Suitability of working rooms	4				
	Quality and suitability of equipment		3,6			
	Catering (if applicable)		3,3			
Programme	Planning and timescale			2,8		
	Balance between lectures (information) and working sessions (participation)			2,8		
Content/delivery	Relevancy of content of presentations with regard to the topic and the aims of the training		3,6			
	Competence of the speakers	4				
	Competence of the workshop leaders		3,9			
	Inter-activity of the event (needs and expertise of participants are taken into account)			2,5		

	Adequacy of working methods			2,8		
	Variety of presentation methods			2.9		
Materials, resources	Relevancy and quality of the material		3,2			
	Variety of sources used for the material		3,5			
	Usefulness of the material in your future work		3,2			

Impact	
<p>Aims:</p> <p>Did your objectives for coming to this training have been met?</p>	<p>The vast majority of participants have cited that the course fulfilled their expectations.</p> <p>The set goal of all the listeners was to acquire new information from the area of R & D projects, innovations and technical transfer.</p>
<p>Coverage:</p> <p>Is there anything else you would like the events to have covered?</p>	<p>The vast majority of participants have stated that the course was comprehensive by the scope of the topics.</p> <p>Almost 30% of learners have mentioned, as a recommendation, to apply the theoretical knowledge more into practice with examples of specific projects.</p>

<p>Achievements:</p> <p>What are, according to you, the major achievements of this training initiative?</p>	<p>The majority of participants have stated that the acquisition of new information from the taught issues, the information on sources of professional literature were the greatest benefits.</p> <p>Almost all of the participants have cited that the training course was beneficial for them in respect to the acquisition of new information and knowledge.</p> <p>Any of the students did not mention negative feelings.</p> <p>The responses showed that the participants were addressed by the attractiveness of the topic itself.</p>

SUGGESTIONS: what to keep next time, what to change next time:

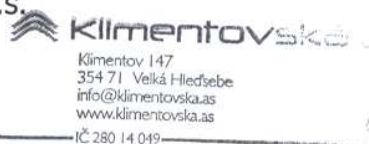

In general the participants have stated that they would keep the course in its present form. The recommendation, which has appeared the most often (62% of participants), was to apply practical examples in the lectures and to involve students in the discussions, to include more of interactivity between the lecturer and students.
